

D-BIR FEDERAL CAPABILITY SOLUTIONS

Turning mission data into trusted decisions and measurable results

We turn mission data into trusted decisions with analytics, automation, and modernization that reduce workload, defend funding, and improve outcomes.

Company Overview

Dynamic Business Intelligence Resources (D-BIR), LLC is a Veteran-Owned Small Business (VOSB) delivering business intelligence, data science, technology modernization, and business process automation for federal, state, and local missions.

We help agencies modernize legacy processes, strengthen data quality, automate recurring workflows, and convert complex source-system data into actionable, defensible decision support.

D-BIR Positioning

The data, automation, and decision-support partner that helps federal leaders integrate mission data, reduce manual workload, defend funding decisions, and monitor performance with repeatable, auditable analytics.

- Federal-ready delivery model: database and data-integration layer + Power BI analytics layer + SharePoint and Power Platform workflow layer.
- Designed for missions where leadership needs confidence, speed, traceability, and practical implementation - not just reports.

Strategic Fit for Federal Agencies

- Portfolio analytics for facilities, healthcare, finance, logistics, operations, program performance, and mission support.
- Data architecture, integration, quality, reconciliation, and governance across complex federal source systems.
- Executive dashboards that translate technical data into mission impact, funding posture, risk, readiness, and performance views.
- Low-code/no-code workflow automation for intake, review routing, approvals, recurring data calls, and tasker/request-for-information tracking.
- Repeatable documentation, quality-control methods, and decision models that make outcomes auditable and defensible.

D-BIR Federal Solution Stack

- 1. Integrate** - Combine facility, financial, operational, project, workforce, and mission data.
- 2. Reconcile** - Profile, standardize, validate, and align records so leaders can trust the portfolio view.
- 3. Automate** - Replace repetitive Excel/email churn with controlled SharePoint, Power Apps, and Power Automate workflows.
- 4. Analyze** - Build performance measures, scoring models, scenario tools, dashboards, and drillthrough views.
- 5. Govern** - Document definitions, data lineage, data owners, quality checks, and reporting procedures.

MISSION-READY USE CASES

Decision Dashboards Executive, program, regional, site, asset, and project drillthrough.	Data Quality Profiling, reconciliation, source-of-truth alignment, and issue tracking.	Process Automation Intake, approvals, data calls, notifications, and status routing.	Scenario Modeling Funding, prioritization, risk, workload, and resource tradeoff views.
Facilities and Operations Facility lifecycle planning, sustainment, modernization, real property, BUILDER/SMS, O&M, and work-order analytics.	Technology Modernization Database development, application development, migration support, and SharePoint integration.	Compliance Support RMF, NIST, FISMA, HIPAA, and FedRAMP-aligned documentation and controls support.	Executive Products Briefs, build sheets, SOPs, governance documents, and board-ready products.

Relevant Performance

Proven Defense Health Agency Facilities Enterprise Experience - Applied Across Federal Missions

D-BIR brings active hands-on support from two Defense Health Agency Facilities Enterprise efforts aligned to federal needs in data-driven decision support, automation, technology integration, sustainment and operations analytics, reporting, and executive governance.

Core Capability Areas

Data Management and Architecture - Warehousing, data integration, database development, administration, modernization, metadata, and governance.

Business Intelligence and Advanced Analytics - Power BI dashboards, performance metrics, predictive analytics, AI/ML support, and decision products.

Enterprise Technology and Software Development - Custom applications, SharePoint integration, cloud-based solutions, and modernization support.

Automation and Process Optimization - Power Apps, Power Automate, workflow automation, and process redesign.

DHA Facilities Enterprise Portfolio Business Integration Support

- Enterprise analytics and informatics for data-driven decision-making and capital investment support.
- Requirements gathering, application development, business/data analysis, dashboarding, and analytic tool development.
- Data quality management, profiling, reconciliation, structured database support, SharePoint/Power Platform automation, and executive reporting.
- Direct relevance: objective prioritization, scenario analysis, funding defense, recurring data calls, and portfolio governance.

DHA Facilities Enterprise Facilities Operations Branch Support

- Supports facility lifecycle management activities, including sustainment, modernization, operations, real property, BUILDER, information management, compliance, and financial services.
- Aligns to planning, programming, execution, maintenance, repair, modernization, and project prioritization functions.
- Supports reliable facility data, standardized business processes, and leadership visibility across facility portfolios.
- Direct relevance: facility sustainment workflows, project/status visibility, BUILDER/Sustainment Management System support, and operational trend analysis.

Federal Mission Areas We Support

- Defense, healthcare, logistics, finance, facilities, operations, and program management portfolios.
- Sustainment, modernization, real property, facility lifecycle, and operations and maintenance decision support.
- Executive performance management, stakeholder reporting, data governance, and acquisition support products.

Data Inputs We Can Operationalize

- Facility inventory, asset hierarchy, ownership, real property, square footage, and condition records.
- Project lists, funding lines, schedules, requirements, work orders, estimated/actual cost, and execution status.
- Operational workload, program performance, workforce, financial, compliance, mission priorities, and risk indicators.

STRATEGIC ADVANTAGE FOR FEDERAL AGENCIES

Mission-Driven

D-BIR designs analytics around operational decisions, not just reporting outputs.

Implementation-Focused

We connect database architecture, Power BI, SharePoint, Power Platform, and governance documentation into usable solutions.

Federal-Proven

Current Defense Health Agency Facilities Enterprise performance gives D-BIR practical knowledge of DoD facilities, healthcare, finance, and program data realities.
